PREFACE

The publication is prepared by the Survey Operations Unit of the Alberta Bureau of Statistics. The statistics presented in the publication are based on the results of the Retail and Service Statistics survey which annually collects information from all known establishments in the retail and service trade sector in Alberta. All statistics released have met the Bureau's confidentiality constraints which prevent disclosure of information pertaining to an individual establishment.

Appreciation is extended to all the businesses in the retail and service sectors which annually provide the information used to prepare this publication.

The publication, to date, has been utilized by a diverse audience in both the public and private sectors. All requests for additional copies of this publication, enquiries as to procedures and methodology used, or general comments should be directed to:

Appendix C
Municipal Population Statistics 176

INTRODUCTION

This publication is the ninth in an annual series and presents statistics for over 160 types of businesses in the retail and service trade sectors in Alberta for 1980. Statistics are arranged by number of outlets, number of employees (part-time and full-time), payroll and total receipts from sales and services.

Included in the publication are: a survey overview that gives a description of the survey; survey summary results which highlight and give summary analyses of the fifty-two tables in the results section; and appendices which detail the types of businesses surveyed, provide definitions of terms used throughout the publication and data on municipal population.

The survey results are contained in 52 tables which are divided into six major sections. Statistics are available for Alberta, cities within Alberta, sixteen towns of population over 5,000; forty-one towns with populations between 2,000 and 5,000; selected towns of population less than 2,000; and municipalities within Census Divisions. Each section includes a composite table and individual tables for each population grouping.

SURVEY OVERVIEW

The Alberta Bureau of Statistics annually conducts the Retail and Service Trade Statistics survey. The survey is a mail-out mail-back survey, and is distributed to all retail and service trade establishments in Alberta. Excluded from the survey are: professional service trades, establishments which provide a service to other businesses, retailing as a minor activity of wholesalers or manufacturers and door-to-door selling.

Data in the publication are arranged by type of business. Each business has been classified according to the Standard Industrial Codes (SIC)

implemented by Statistics Canada in 1971. For each type of business, respondents have provided information for the number of employees (full-time and part-time), payroll and total receipts from sales and services. The types of businesses surveyed are detailed in Appendix A.

The data for businesses that did not respond to the 1980 survey were individually estimated based on current data from similar types of businesses that responded to the survey and historic data from the non-responding business. Actual and estimated data were aggregated to provide the total trade levels for Alberta and the subprovincial areas. Sixty-seven percent of the total trade figure for Alberta was based on actual data received from survey respondents. Sixty-nine percent of the total retail component was based on actual survey response whereas sixty percent of the service trade component was based on actual survey response. Response ranged from fifty-seven percent in the personal services category to seventy-eight percent in the general merchandise category. Based on the number of businesses that responded to the survey, the response rate was fifty-four percent - fifty-six for the retail group and fifty-one for the service trade group.

Statistics presented in the publication conform to confidentiality guidelines of The Statistics Bureau Act of Alberta, Chapter 5-22 of the Revised Statutes of Alberta, 1980, which prevents disclosure of information pertaining to an individual establishment. To prevent residual disclosure of a statistic, it was necessary to suppress some statistics which in themselves were not confidential. An asterisk in place of a statistic indicates that information cannot be released in order to meet the confidentiality guidelines.

Data for number of employees, payroll and receipts are suppressed if statistics would release information for one or two outlets. Statistics are suppressed for three or more outlet totals where one or two outlets account for the majority of the receipts in the grouping. Information on the number of outlets belonging to any type of business is available throughout the publication as disclosure of this type of information is not governed under the Statistics Bureau Act.

As in past years, retail trade statistics published in this report vary from those published by Statistics Canada. Discrepancies can be attributed to differences in survey procedure. Statistics Canada data are based on a sample survey of retail trade, whereas the Bureau surveys all known retail and service trade establishments. The estimation of non-respondents is derived using different population parameters because of the difference in survey procedure. Variation in the inclusion or exclusion of specific SIC's in the retail and service trade sectors also accounts for discrepancies in the data.

SUMMARY RESULTS

Results for the 1980 Retail and Service Trade statistics survey are presented in fifty-two tables which are available in Sections 1 through 6. Given the amount of data presented, instead of analyzing each table, summary analyses and highlights have been prepared from the results tables and are presented in Tables I to V which follow on Pages 9 to 13.

Table I: Distribution of Retail, Service and Total Trade Receipts, by Business Group for 1979 and 1980

Total trade in Alberta increased from 13.7 billion dollars in 1979 to 15.6 billion dollars in 1980. The annual growth rate was 13.5 percent.

The retail trade sector continued to dominate, accounting for 84 percent of total trade in Alberta or 13.1 billion dollars, an increase of 11 percent from 1979. The largest component of the retail trade sector was the automotive group. Similar to recent years, it accounted for 31 percent of total trade. The automotive group had receipts of 4.8 billion dollars in 1980, an increase of 10.6 percent from 1979. The apparel and accessories category, which has historically always been the smallest category in the retail sector, accounted for 4 percent of Alberta's total trade figure or 0.6 billion dollars. Receipts in the apparel and accessories group increased 14.3 percent from 1979. The hardware and home furnishings group recorded the largest yearly increase, 19.4 percent. The food group recorded an increase of 16.9 percent while the general merchandise group, which is the second largest group in size, recorded the smallest yearly increase, 0.9 percent.

/4

The service trade component had total receipts of 2.5 billion dollars, based on a growth rate of 29.4 percent from 1979. It accounted for 16 percent of Alberta's total trade figure, an increase of 2 percent from 1979. The accommodation and food services group which includes hotels, motels and restaurants was the largest category in the service trade sector with receipts of 1.7 billion dollars representing 11.1 percent of the Alberta total trade figure. Two categories in the service trade sector experienced growth rates of over 30 percent. The accommodation and food services category increased by 32.9 percent and the miscellaneous service category, which includes business such as photographers, rental firms and repair shops, increased by 31.9 percent from 1979.

Table II: Distribution of Retail, Service and Total Trade Receipts, by Business Group and Size of Community for 1980

Retail trade expressed as a percentage of the total trade for each population grouping varied between 81.8 percent in towns of population 2,000-5,000 to 87.7 percent in towns of population over 5,000. The apparel and accessories category accounted for the smallest portion of the retail sector for all population groupings. As a percentage of total trade, apparel and accessories varied between 3.8 percent in towns of population 2,000-5,000 to 4.6 percent in the other cities grouping. The automotive group which includes car dealers and service stations, accounted for the largest portion of total trade in all population groupings. Percentage of total trade varied between 28.8 percent in Calgary and Edmonton to 37.2 percent in towns of population over 5,000. The hardware and home furnishings and the other retail groups, accounted for a larger portion of total trade in Calgary and Edmonton when compared to the other population groupings. These types of speciality stores tend to be located in the large cities.

There is an anomaly in the data when comparing the food category with the general merchandise category for towns of population over 5,000. Receipts for the sale of food products are higher than receipts for the general merchandise category. For towns in this population group, the sale of food products in general merchandise stores sometimes accounts for over 50 percent of the total

receipts. As a result, these stores, that also carry a variety of other commodities, have been classified as part of the food group.

The service trade component expressed as a percentage of the total trade figure varied between 12.3 percent in towns of population over 5,000 to 18.2 percent in towns of population 2,000-5,000. The amusement and recreation category accounted for the smallest portion of total trade for all population groupings. The percentage of total trade was less than 0.6 percent for each population group. The accommodation and food services category was the largest service trade component for all population groupings. The percentage of total trade varied between 9 percent in the other cities group to 15.6 in towns of population 2,000-5,000. Included in the latter are Banff and Jasper which account for a large portion of the receipts in the accommodation and food services category.

Table III: Distribution of Retail, Service and Total Trade Receipts by Census Division for 1980

Census Division 11 in which Edmonton is located, accounted for 36.7 of the total trade in Alberta or 5.7 billion dollars. Census Division 6 in which Calgary is located accounted for 30.1 percent of Alberta's total trade or 4.6 billion dollars. These two regions combined contain about 64 percent of Alberta's population and are responsible for over two thirds of Alberta's total trade. In comparison, Census Division 4 contains less than 1 percent of Alberta's population and accounts for less than 1 percent of total trade.

With the exception of Census Division 9, all Census Divisions have a dominant retail trade component. Retail trade accounted for 80.8 to 89.1 percent of the total trade. The service trade component accounted for 10.9 percent to 19.2 percent of total trade. In Census Division 9, the retail component was 49.9 percent of total trade and the service trade component was 50.1 percent of the total trade. The large service trade component reflects the tourism industry located in Banff, Jasper and Waterton National parks which are located in Census Division 9.

/6

Table IV: Distribution of Retail, Service and Total Trade Receipts Per Capita by Census Division for 1980

Based on the 1980 total trade figure for Alberta, the receipts per capita were 7,268 dollars. Receipts per capita for the retail and service trade sectors were 6,105 and 1,164 dollars, respectively.

Receipts per capita across all Census Divisions ranged from 4,692 dollars in Census Division 4 to 12,043 dollars in Census Division 9 for total trade. Receipts per capita for the retail sector ranged from 4,138 dollars in Census Division 4 to 6,978 dollars in Census Division 8. In the service trade sector receipts per capita ranged from 533 dollars in Census Division 4 to 6,035 dollars in Census Division 9.

Census Division 9 had the highest receipts per capita for total trade and the service trade sector. Again this is a reflection of the large tourism industry generated by Banff, Jasper and Waterton National Parks.

Census Division 6 which includes Calgary had total trade receipts per capita of 7,367 dollars. Census Division 11 which includes Edmonton had total trade receipts per capita of 7,765 dollars. The receipts per capita in Census Division 11 tend to be higher than Census Division 6 because Edmonton serves as a trading centre for all of Northern Alberta. In general, Census Divisions with major cities have higher receipts per capita because of an influx of trade into the cities from the surrounding areas. This is particularly evident with the service trade sector where the service industries tend to be more developed in the larger centres.

Receipts per capita were relatively high in Census Division 14. This can be attributed to the influx of businesses into the area because of a rapidly growing resource industry.

Table V: Distribution of Retail, Service and Total Trade Receipts: Cities of Alberta for 1980

In 1980, the majority of Alberta's total trade was generated in the urban centres. The twelve cities in Alberta accounted for 75.5 percent of Alberta's total trade or 11.8 billion dollars. Calgary and Edmonton combined accounted for 50 percent of Alberta's population and 60 percent of Alberta's trade. The twelve cities combined accounted for 75.3 percent of the retail sector. Calgary and Edmonton combined accounted for 59.1 percent and 62.2 percent of the retail and service trade sectors, respectively.

Table V also gives an indication of the importance of each city as a trading centre within its respective Census Division. Calgary accounted for 94.8 percent of the total trade in Census Division 6. Edmonton accounted for 84.3 percent of the total trade in Census Division 11. St. Albert and Wetaskiwin are also located in Census Division 11 and accounted for 2.2 percent and 2.5 percent respectively. Five cities, Calgary, Edmonton, Lethbridge, Medicine Hat and Red Deer accounted for the majority of the total trade in their respective Census Divisions.

Blacksmithing and Welding Shops
Electric Motor Repair Shop
Miscellaneous Repair Shops, not elsewhere specified
Disinfecting and Exterminating Services
Window Cleaning Services
Miscellaneous Services to Building and Dwellings
Driving Schools
Miscellaneous Service, not elsewhere specified

Appendix B

Definitions

The following definitions apply uniformly throughout this publication.

Principal Statistics - Consists of the number of outlets, full-time and part-time employees, payroll and receipts.

Total Trade - The combined total of retail plus service trade.

Receipts - Includes all (gross) receipts from sales and/or services. Receipts are reported either on a fiscal or calendar year basis.

Payroll - Includes salaries and wages, commissions, bonuses, payments for leaves or holidays and payments in kind. Excluded are proprietor's withdrawals or salaries, and the salaries and wages of employees involved in contract or cartage work. Figures are reported on either a fiscal or calendar year basis.

Employees - Includes full-time (F-time) and part-time (P-time) employees on staff during the last complete pay period of September 1980. Working owners are excluded unless the business is incorporated. Note: Employees and total payroll are not based on the same reference period; therefore, the calculation "average salary per employee" will produce spurious relationships.

Retail Establishments - A business engaged primarily in the selling of merchandise directly to the final consumer.

Service Outlet - A business primarily engaged in providing a service to consumers for a fee.

Business Group - A broad merchandise category under which all related business establishments are grouped (e.g., - Food or Automotive).

Type of Business - The finest breakdown of a business group into its activity classification (e.g., Confectionary Stores or Department Stores).

Reference Period - Statistics are reported by respondents on either a fiscal or calendar year basis.

APPENDIX C

Population - Cities, Towns, Villages, Counties, Municipal and Improvement District and Special Areas, Alberta, 1980

CITIES	POPULATION
Calgary	560,618
